

# ANTHROPOLOGY (BS)

With a four-field approach, anthropology offers a scaffolded foundation to the discipline. It prepares students for graduate study and/or careers in such fields as teaching, research, government, human services, health, law, international business, heritage preservation, law enforcement, forensics, and criminalistics. When paired with premed classes, Anthropology majors (general anthropology or Forensic Investigation and Identification) are well prepared to go into either medicine or forensic medicine. A maximum of two courses may be transferred into the major.
